

AIRQUIP

Since 1997, Airquip has been dedicated to providing comprehensive services for the supply and installation of Workshop Reticulation Systems

(08) 8398 5111

team@airquippipetool.com.au

We specialise in various areas, including Compressed Air, Nitrogen and Argon Systems, Oil, Grease & Coolant Reticulation and Waste Systems. We utilise a variety of piping materials, such as Aluminium, 316 Stainless Steel, Heavy Wall High-Pressure HDPE Piping and Kwik Fit Piping Systems.

We offer a diverse range of essential equipment, including Compressors, Oil pumps, Waste pumps, Gantries, Reels, Metered supply guns, Tanks and control automated system software. These products come from recognised brands and are backed by warranties for up to 5 years

Our expertise ranges from single bay garages to South Australia's largest heavy earthmoving maintenance facility, and Specialised defence projects.

Reach out to our team of specialists today to explore system design and installation options for your new facilities or to discuss additional services for existing Workshops
